PROFESSIONAL SUMMARY

Azure Data Engineer with 4+ years of experience building and optimizing enterprise data pipelines on the Microsoft Azure platform. Skilled in Python, PySpark, SQL, Azure Databricks, Azure Data Factory, and Delta Lake. Hands-on experience implementing Medallion Architecture, Unity Catalog, and scalable ETL/ELT solutions in healthcare and managed care environments. Passionate about delivering clean, reliable data that drives better business decisions.

TECHNICAL SKILLS

Programming: Python, PySpark, SQL (Advanced), Shell Scripting

Azure Services: Azure Databricks, Azure Data Factory (ADF), ADLS Gen2, Azure SQL Server, Azure Key Vault, Azure Monitor

Data Architecture: Medallion Architecture (Bronze/Silver/Gold), Delta Lake, Data Lakehouse, ETL/ELT Pipeline Design

Data Governance: Unity Catalog, RBAC, Data Lineage, HIPAA Compliance, Data Quality Frameworks

DevOps & CI/CD: Azure DevOps, Git, CI/CD Pipelines, Branch Management

Orchestration: Azure Data Factory, AutoSys, Databricks Workflows

Visualization: Power BI (DAX, KPI Dashboards)

Tools & Methods: Jupyter Notebook, VS Code, PyCharm, Agile/Scrum, Jira

PROFESSIONAL EXPERIENCE

Infinite Computer Solutions (ICS)

Software Engineer – Azure Data Engineer

Hyderabad, Telangana, India

March 2022 – Present

Project: ImpactPro (IPRO) – Healthcare Data Platform

March 2022 – December 2024

Client: Molina Healthcare — Environment: Azure DEV / UAT / PROD

- Designed and developed end-to-end ETL/ELT pipelines using **Azure Data Factory** and **Azure Databricks** to ingest and process large-scale healthcare datasets into ADLS Gen2 and Azure SQL Server.
- Implemented **Medallion Architecture** (Bronze/Silver/Gold) using PySpark, transforming raw source data into clean, validated, business-ready datasets that supported clinical and financial reporting.
- Led the implementation of **Unity Catalog** as the central governance layer — configured fine-grained RBAC, data lineage tracking, and access policies ensuring full **HIPAA compliance**.
- Built Python automation scripts to replace manual data ingestion and validation tasks, achieving a **40% reduction in manual engineering effort** and faster data delivery.
- Configured **AutoSys** and **Databricks Workflows** to schedule and monitor batch PySpark jobs with automated failure alerts, ensuring consistent and fault-tolerant pipeline execution.
- Developed a SQL-based **data quality validation framework** to check integrity, completeness, and accuracy across all pipeline layers, reducing downstream data issues.

Project: MCDA/MLTSS – Managed Care Data Analytics Platform

January 2025 – Present

Client: Managed Care Organization — Environment: Azure DEV / UAT / PROD

- Architected scalable **ELT pipelines** using Azure Databricks and ADF to process managed care and long-term services and supports (MLTSS) data, enabling timely reporting for operational and compliance teams.
- Designed **parameterized ADF pipeline templates** and modular Databricks notebooks to improve pipeline reusability and reduce build time across new data workstreams.
- Partnered with business stakeholders to define and implement **KPIs and Power BI dashboards** for managed care performance metrics, supporting leadership decision-making.
- Managed complete **CI/CD deployments** via Azure DevOps — handled branching strategy, pull request reviews, and automated releases to DEV, UAT, and PROD with zero-downtime deployments.
- Participated in **Agile/Scrum ceremonies** including sprint planning, backlog grooming, and retrospectives; tracked all deliverables in Jira and coordinated across architects, QA, and client stakeholders.
- Collaborated with data architects to extend the **Delta Lake** data model for new MLTSS source systems, improving query performance and long-term maintainability of the data platform.

CERTIFICATIONS

Databricks Certified Data Engineer Professional <i>Databricks</i>	2024
Demonstrated advanced skills in building and managing production data pipelines on Databricks, including Delta Lake, Databricks Workflows, Unity Catalog, and performance optimization at scale.	

EDUCATION

Joginpally B R Engineering College	Hyderabad, Telangana, India
<i>Bachelor of Technology (B.Tech) – Mechanical Engineering</i>	<i>Graduated: 2021</i>
CGPA: 6.72 / 10.0	

CORE COMPETENCIES

Data Pipeline Design & Optimization Cloud Data Architecture ETL/ELT Development Data Governance & Compliance Agile Delivery Stakeholder Communication Problem Solving Team Collaboration
